

Onyx

Onyx is the industry's first digital scheduling and billing system for your Traffic Control team. Onyx's virtual timesheet system integrates dispatching, invoicing, billing and payroll. Schedule, monitor and communicate with your team all in one platform.

Dispatch

- Manage operations seamlessly with Onyx. Dispatch unlimited daily jobs with this new employee and fleet management tool.
- Onyx allows for customizable worksite information, assigning work crews, and location tracking.
- Once assigned, employees will automatically receive notifications and can respond to job requests in real-time, ensuring full labor coverage on every job!

Payroll

- Modelled after traditional paper timesheets, Onyx automatically calculates staff's hours with little to no overhead.
- Fully customizable for tracking individual per diems, travel, and driving hours.
- Saves 100s of hours in administration costs

Invoicing

- Onyx seamlessly integrates accounting, employee lodging, and invoicing.
- With the ability to set up line items, item kits, and price guides for all standard, unique, and one-off flagging operations.
- Invoices get generated automatically from the system, significantly decreasing delayed billing.
